EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE SPECIFICATION (filed on 8/24/01):

-On page 5, line 24 to page 6, line 4, the paragraphs:

"It has proved to be advantageous for a method in accordance with the invention and for a communication station in accordance with the invention as well as a data carrier in accordance with the invention when, in addition, the measures as defined in claim 2 and in claim 6 and in claim 10, respectively, are taken. In practice, these embodiments have proved to be particularly advantageous because with these embodiments a particularly short time for an interrogation cycle is attainable and because with these embodiments a very rapid identification of all the data carriers in accordance with the invention within the communication range of the communication station is possible.

In addition, it has proved to be very advantageous for a method as mentioned above and a communication station as mentioned above as well as a data carrier as mentioned above when the measures as defined in claims 3 and 4, and 7 and 8, as well as 11 and 12, respectively, are taken. Thus, it is achieved by simple means and in a simple manner that additional information coupled to the acknowledge signal can be transmitted from a communication station in accordance with the invention to a data carrier in accordance with the invention."

is replaced with the following paragraph:

--It has proved to be advantageous for a method in accordance with the invention and for a communication station in accordance with the invention as well as a data carrier in accordance with the invention when, in addition, the measures as defined in claims 1 and 2, and in claims 3 and 4, respectively, are taken. In practice, these embodiments have proved to be particularly advantageous because with these embodiments a particularly short time for an interrogation cycle is attainable and because with these embodiments a very rapid identification of all the data carriers in accordance with the invention within the communication range of the communication station is possible. Thus, it is achieved by simple means and in a simple manner that additional information coupled to the acknowledge signal can be transmitted from a communication station in accordance with the invention to a data carrier in accordance with the invention. --

2. Note that the above Examiner's Amendment is necessary because the original claims 2-4, 6-8 and 10-12 were canceled, and claims 15, 16, 19, and 20 are currently allowed claims which will be renamed as claims 1-4, respectively, when the application is patented. The Examiner's Amend is made in order to correct all references to claims 2-4, 6-8 and 10-12 on page 5 of the Specification.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuong Phu whose telephone number is 571-272-3009. The examiner can normally be reached on M-F (8:00 AM - 4:30 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jay Patel can be reached on 571-272-2988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
